RE: Letter of Recommendation

Dear Chairman,

I would like to confirm D.D.E Attard Limited as the company which was entrusted by Air Malta plc to carry out a number of service engagements. These services comprised the following:

- The removal, transportation and shipping of ca.500 cubic meters of Asbestos contaminated material (ACM);
- Repair works on ACM sheeting at one of Air Malta's maintenance Hangar facilities
- The clean-up of Air Malta's machine shop facility from ACM

Throughout this engagement all works were completed by D.D.E Attard Limited in an efficient and timely manner, in accordance with the terms of the contract. On the basis of this I, on behalf of Air Malta plc, recommend D.D.E Attard Limited for any services which are similar in nature to the above.

Yours faithfully,

Ing Anthony Cachia  
Head Facilities Management and Administrative Services

To Whom It May Concern:

## **DDE Attard Ltd**

DDE Attard Ltd have been entrusted with the dismantling and disposal of redundant plant at the old underground part of Marsa Power Station. This included the four turbines and four boilers, each of 5MW capacity.

The works were carried out in stages (due to constraints from the Enemalta) with a total duration of one year, commencing July 2007 and proceeding to November 2011, and without a single accident. DDE Attard Ltd are well equipped and experienced in this sector.

## **To whom it may concern,**

This is to confirm that contractors, **Messrs. DDE Attard Ltd**, had purchased substantial equipment and machinery following a public auction that was handled on behalf of Government by the company, Ricasoli Tank Cleaning Ltd, in February 2013. Such machinery consisted of a number of overhead hook and magnet cranes, three dockside cranes and various other heavy mobile machinery located on site at the Ex-Malta Shipbuilding Co Ltd in Marsa.

We confirm that the named contractor had carried out all the dismantling and took delivery of all the machinery and equipment they purchased within agreed time frames and with due diligence in accordance with the agreed risk assessments and method statements. No incidents were reported during these works that spanned over a period of six months. Adequate insurance cover was also put in place by the contractor during the carrying out of such works. Payments for the purchased equipment were also made by the contractor in line with agreed payment schedules.

From our experience, the contractor is organised and has trained and experienced personnel capable of carrying out such works in an efficient and safe manner. The contractor also has the required mobile equipment to handle such large scale works and to take delivery of large structures in an efficient manner.

Based on our own experience as explained above, we have no reason not to recommend DDE Attard Ltd for other similar projects.

To Whom It May Concern:

## **DDE Attard Ltd**

Over the past twenty years DDE Attard Ltd have been awarded various projects involving dismantling and disposal of redundant plant at Marsa Power Station. These included the four MSF distillers, Boiler 1, the old underground turbine hall (four turbines), the old underground boiler hall (four boilers) and a number of overhead coal conveyors.

The works were carried out in time and without a single accident. I was very satisfied with the service provided. DDE Attard Ltd are well equipped and experienced in this sector.

**30<sup>th</sup> September 2014**  
**Letter of Reference.**

To whom it may concern.

This is to certify that DDE Attard Ltd. was engaged in dismantling the 33kv line from Marsa to Mosta in 2008 and was again engaged in 2011 to dismantle two 33kv lines from Mosta to Mellieha.

In each case the contractor had to dismantle both the overhead lines and the supporting pylons and cart away all the dismantled material leaving site clean from any debris.

Works were carried out to our satisfaction and would recommend DDE Attard Ltd. to carry out other similar works.

24<sup>th</sup> August 2015

To Whom It May Concern:

## **Salv Bezzina & Sons and DDE Attard Ltd**

DDE Attard Ltd have been entrusted with the dismantling and disposal of a 40m steel/concrete chimney at Marsa Power Station. The contract included cleaning and dismantling of three fuel tanks.

Dismantling of chimney required a 200T crane with a 60m lattice jib. The crane was assembled, operated and dismantled by Salv Bezzina & Sons staff on behalf of DDE Attard Ltd. Work was carried out in a fast, safe and efficient manner.
